

MCI SUPPORT RESOURCES

- Ambulance resources needed beyond the capacity of local providers and routine mutual aid agreements are requested through the Medical Health Operational Area Coordinator (MHOAC).
- Non-traditional transport resources (buses, vans, etc.) and other MCI resources (MCI trailers/caches, Disaster Medical Support Units, etc.) are requested and coordinated through the IC and/or local OES/EOC/MHOAC.
- S-SV EMS will collaborate with the local MHOAC and/or the RDMHS as needed regarding the ordering and coordinating of prehospital EMS resources, and will assist with submission of required OA Resource Request and SITREP forms as needed.
- Immediate need EMS transport resources may be requested directly from S-SV EMS to reduce response delays in the event that requested resources are available from within the S-SV EMS jurisdiction.
- Routine MCI events (managed with local/S-SV EMS jurisdictional mutual aid resources) do not involve an expectation of reimbursement from the requesting OA by the EMS mutual aid provider.
- Large/extended events (including requests for ambulance strike team resources, patient evacuations, etc.) must be requested/authorized by an appropriate OA entity (OES/EOC/MHOAC). The requesting OA maintains financial responsibility for any EMS resource utilization costs incurred in these situations.
