**Course Description:** Accurate assessment of a child with an acute illness or injury requires special knowledge and skills. ENPC gives nurses the tools to provide expert care for patients from birth to adolescence.

- Pediatric Assessment Triangle
- Early Intervention
- Family Presence

ENA developed the Emergency Nursing Pediatric Course to establish a standardized body of pediatric emergency nursing knowledge and to improve the care of all pediatric patients. This sixth edition course combines interactive learning with scenario-based assessments to give nurses a comprehensive learning experience. The course includes:

- *A Systematic Approach to the Initial Assessment:*  
The first few minutes of medical and trauma care for a young person are critical to achieve better patient outcomes. The A-I mnemonic and the Pediatric Assessment Triangle will assist nurses in providing appropriate and early intervention
- *Hands-on Training Using both an Individual and Team Approach:*  
Six teaching scenarios offer nurses the opportunity to practice the systematic approach of the initial assessment in real life situations.
- *2 Day Intensive Course with Expert Instructors:*  
ENPC is a 2 day intensive course that is taught by expert instructors. There is a faculty ratio of approximately one faculty per four learners.
- *Evidence-based Content Developed by Pediatric Emergency Experts*  
A 23 chapter comprehensive manual includes special emphasis on age and developmental stages.

**Seating is limited. PRE-REGISTRATION AND PRE-PAYMENT ARE REQUIRED.** Participants must attend all days per session selected. To register call the Enloe Education Center at 530.332.7509.
